

Brushless DC Circulating Pump

(Mechanical Seal)

Feature :

- * Low temperature rise and durability.
- * Tenfold life time to AC brush motors.
- * Variable speed available and low noise.
- * High level of efficiency and energy-saving.
- * Totally design and manufacture in Taiwan.
- * Without carbon pollution, environmentally friendly and free maintenance.

Motor protection :

- * Reverse polarity, Soft start protection, Over-load protection, Locked-rotor protection, Over temperature protection, Over voltage protection, Lower voltage protection.

Performance

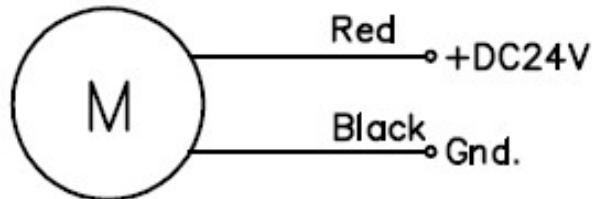

Motor Protection :

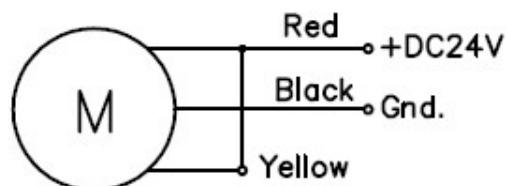

- ◆ Reverse polarity: out of action when positive and negative pole is reversed.
- ◆ Soft start protection: slowly starting and speeding.
- ◆ Over load protection: out of action when current is over 16A, starting afresh while load lower than 16A
- ◆ Locked-rotor protection: out of action when rotor is locked, starting afresh after block is cleared.
- ◆ DC24V over voltage & lower voltage protection: 16~32V
- ◆ DC12V over voltage & lower voltage protection: 9~14V
- ◆ Over temperature protection: out of action when motor temperature is over 85°C, starting afresh while lower than 80°C. (operating temperature range: -30°C ~ 50°C.)
- ◆ IP level: IP54 ~ IP66
